

Appl. No. : 09/847,759
Filed : May 2, 2001

IN THE SPECIFICATION

Please amend paragraph beginning at line 26, col. 2 as follows:

D₁ FIG. 1 is a top, front, right-side perspective view of a preferred embodiment; ~~and~~

Please amend paragraph beginning at line 28, col. 2 as follows:

D₂ FIG. 2 is an enlarged top, front, right-side perspective view of a portion thereof;

After line 29, col. 2, please add the following new paragraphs:

D₃ FIG. 3 is a schematic front elevational view of the embodiment of FIG. 1, showing threaded fasteners extending through apertures therein;

FIG. 4 is a schematic side elevational view of a cooler shelf adjustably mounted with clips that engage notches; and

FIG. 5 is a schematic rear elevational view of the preferred embodiment of FIG. 1 hanging from a cooler shelf and illustrating a clearance therebetween.

Please amend paragraph beginning at line 52, col. 2, as follows:

D₄ Support legs 22a are formed by bending opposite ends of the rods 10a, 10b, 10c to project downward from a bottom at 20 of the shelf to lowermost ends. The support legs support the shelf at 16 above another structure (not shown) such as a shelf in a walk-in cooler, for example. However, in view of the framework at 22b described below, it would be equivalent in another embodiment (not shown) to have the shelf at 16 fastened under the other structure to hang the framework under the other structure, the shelf at 16 in such an arrangement also being considered herein as superimposed relative to the other structure. For example, the panels 10e, 10f could have holes 11 (shown in phantom in FIG. 1)~~(not shown)~~ for threaded fasteners 15 to a cooler shelf S.
